Simplicity: Managing crypto wealth and getting exposure to crypto currencies becomes easy and straightforward.

Security: Use of Coinbase custody, a NYDFS-regulated qualified custodian for crypto currencies, which combines latest technology, robust internal processes and industry-leading insurance to keep crypto currencies as secure as possible.

Investments & Services: The smarter way to invest in crypto currencies. A wide range of sophisticated investments from alpha generating to capital protection funds linked to crypto currencies. The platform offers an exclusive access to those unique and innovative investments which can be subscribed using either cash or crypto currencies.

Sophistication & Personalisation: Design of bespoke execution or alpha generating quantitative strategies. Financial solutions on crypto wealth, whether investment, income or hedging driven, with potential for personalised offerings.
